Slips

Bias slips for infants are cut without fullness and will stretch lengthwise or crosswise; straight ones need extra fullness across back and chest.

Slips with raglan sleeves are comfortable for cool days; sleeveless designs for mild weather (page 1).

Full length front openings simplify dressing and laundering. Wide laps spread for kicking room. Petticoats are unnecessary with these slips.

Necklines cut low at front will not pull back and choke.

Soft, firm nainsook of durable quality, in white or pastel color, is comfortable, attractive, and will stand frequent launderings. French seams $1/16$ " wide, and trim such as shell-edge, binding, or narrow hems (page 3) are soft and comfortable in babies' clothing.

Tie Fastenings (Page 3-B)

To make: Mark a 12" piece of $3/16$ " twistless tape at center, stitch, with tape reinforcement on under side, to proper place on left side of slip. Turn ends of tape back $1/2$ ", wind solidly with embroidery thread, taking occasional stitches to make secure. Make firm crocheted or blanket stitched loops on right of slip.

Diapers (Page 2)

The shaped adjustable diaper has an open upper back into which rubber sheeting may be inserted for special protection.

Sleeping Garments

A nightgown (page 2) cut long to cover the feet is made of soft knit cotton fabric with a two-way stretch. Kimono sleeves allow this material to give readily across the back and chest.

A double-breasted sleeping bag, of cotton flannel or similar fabric, is cut in one piece with seams only at shoulders. The back laps up over the front and snaps through eyelets. (page 3-C)
